GRADE 6: NATURAL SCIENCES & TECHNOLOGY

3 August to 14 August 2020

Hi Strubies learners and parents!

I hope you are all doing well. The Grade 6 learners have been working hard at school and are going to have a break from the 27th to the 31st of August.

The Grade 6's have received Booklet 3 about *Matter & Materials and Processing* at school on 23 and 24 July. The work in the booklet can be completed by the learners at home from 3 August.

The class test that was due to be written on the 28th or 29th of July will now be written when the learners return to school - so please ensure that they revise their work for then.

The activities are very similar to work done during the first lock down. If the learners have already done these activities, then they do not have to be redone. The answers can simply be copied into the booklet.

In your work book the materials require very *hot water*, but *that is dangerous!* **DO NOT USE VERY HOT OR BOILING WATER!** Rather use warm water from the tap, the same temperature as you would use to bath in, not hotter! All activities should be done with the permission and supervision of an adult!

God bless you all!

Be safe, be smart, be kind!
Mrs. Becker
